To:

Dan Christen
Senior Attorney
Microsoft Corporation
One Microsoft Way, Redmond,
WA 98052, USA

Dear Dan Christen:

Everyone knows the fact that FSTW is a function newly added to Windows XP. Microsoft is advertising this fact in the legitimate manual "First Step Guide" attached to Windows XP. If this functionality had been achieved in 1995, it means Microsoft advertised false to the consumer. What do you mean by the terminology "this same basic functionality" in your letter?

In anyway, the claim chart you request is very simple. All parts of my claims stand for the positive item of the chart. Every line and every word covers the function provided by the FSTW tool. If you want to know more precise information, you should indicate your patent corresponding to FSTW.

Concerning the novelty and the advancement of my patent, you have no right to say anything. Your technology can't exceed my patent, though my patent completely covers your FSTW function. Many bugs so far appeared in the FSTW tool objectively show the novelty and the advancement of my patent, because of the following reason. If you are familiar with the FSTW-like function, such bugs never occur.

We already started the preparation for taking the legal process. Let's meet at the bar of justice.

With regards,

Jinsei Yamaguchi, Ph.D.

CEO Chairman,

I.I.I.
